APPOINTMENTS.

No. 2273.—The following are appointed to the Indian Army Reserve of Officers subject to His Majesty's approval. :—

To be Second Lieutenants.

(Infantry Branch.)

Pierre Neal Arthur Lucas, dated 23rd September 1918.

S. B. MURRAY,
Secretary to Government, P. W. D.

Fort St. George, October 24, 1918.

It is proposed to issue the following rules for the distribution of water for *second crop* in the Godavari Delta (Eastern, Central and Western sections). Notice is hereby given that the said rules will be taken into consideration on or after the 3rd January 1919. Any objections or suggestions that may be received from any person before the aforesaid date will receive due consideration.

DRAFT RULES FOR THE DISTRIBUTION OF WATER FOR SECOND CROP IN THE GODAVARI DELTA (EASTERN, CENTRAL AND WESTERN SECTIONS).

Rule 1.—The period of second crop to which these rules relate will extend from the 1st January to the date of closure of the canals in any year, which, unless otherwise notified in the district gazette, may be taken to be the 15th April for the Central delta and the 1st May for the Eastern and Western deltas.

Rule 2.—A three-year programme of channels or reaches of channels that will be kept open for second crop will be drawn up by the Executive Engineer in consultation with the Collector and published in the district gazette at least one year in advance, i.e., by the 1st January preceding the first year of the 3-year cycle. The programme will be subject to modification of which due notice will be given.

Rule 3.—The following points should be kept in view in drawing up the programme and carrying out the distribution during the second crop season :—

(1) Concentration in blocks of the area to be supplied should be effected as far as practicable.

(2) For the cultivation under 'closed' channels of sugarcane or of dry or garden crops, water will, when practicable, be given at intervals of ten to fifteen days, provided that, in the opinion of the Executive Engineer, the area under such cultivation is properly commanded and is sufficient to warrant such treatment. (*Note.*—Cultivation of *paddy* under 'closed' channels is prohibited.)

(3) Channels in the Godavari Eastern and Central deltas under which not least 3 per cent of the first crop area is under sugarcane will always be kept open during the second crop season, provided that, in the opinion of the Executive Engineer, the area under such cultivation is properly commanded.

(4) Water required for fodder and manure crops and for flooding saline lands or decomposing stubble will, if available, be supplied up to the end of January, but water taken thereafter for these purposes will be charged water-rate.

(5) Water for filling drinking-water tanks will be allowed once during the month of February and again shortly before the general closure of the canals. A list of such tanks will be published in the district gazette.

Rule 4.—Should it be necessary, on account of special circumstances such as shortage of water or want of command or any other sufficient reason, to resort to turns not specifically authorized by the Executive Engineer, the sub-overseer will inform the sub-divisional officer immediately by telephone and obtain orders from him for the temporary expedients to be adopted. The sub-divisional officer should without delay send a copy of his orders to the Executive Engineer and to the village officers concerned, for information. In cases of great exigency and where immediate telephonic orders cannot be obtained, the sub-overseer will act in anticipation of sanction but will immediately report his action for the orders of the sub-divisional officer. He should in such cases notify the village officers also of his action without delay.

Rule 5.—If the arrangements provided for in rule 4 are inadequate to meet requirements, turns by reaches of canals may be arranged, but no turns of this sort should be resorted to without the previous sanction of the Executive Engineer which may, when necessary, be obtained by telephone, but should be confirmed in writing.

Rule 6.—Direct baling from channels will not be permitted. Lands so irrigated will be liable to be penalised.

Rule 7.—The Executive Engineer may, with the concurrence of the Collector, temporarily modify any of the rules to suit any special circumstances.

Rule 8.—The prescribed daily water reports and registers should be maintained during the second crop period.

APPLICATIONS FOR AID TO ELEMENTARY SCHOOLS DURING 1919-20

Correspondents of elementary schools for boys of all the grades within the jurisdiction of the Triplicane range, that wish to have their schools aided during 1919-20, are hereby requested to send in their applications in the form prescribed in Rule 17 of Chapter III of the Grant-in-Aid Code by 30th November 1918 at the latest. Those received later will run the risk of being rejected.

2. Blank forms of application can be had at the office.

3. In column (3) of the application, the correct address of the school should be given. Very often the old, antiquated and obsolete name of the street or locality is given and this causes no small inconvenience or difficulty in finding out the school. The number of the municipal division, the name of the locality, street and the precise door number—all these are therefore indispensable.

4. Column (4) should clearly state whether the society or association owning the school is registered or otherwise.

5. Column (5) should exhibit the name of the correspondent with his address *since it distinct.* Where the manager owning the school and the correspondent are one and the same individual, the fact should be mentioned.

6. It is the column (6) concerning teachers that requires special attention. The vague entries 'Trained,' 'Primary Trained,' 'Lower Secondary Trained' are often meaningless. In the case of a trained teacher, the following particulars should be furnished:—(i) Period of training—from to (ii) Grade for which trained—Secondary or Elementary (Higher or Lower). (iii) The nature of the certificate held whether probationary or final with date and number in each case.

In the case of a teacher who has not undergone a course of training his general educational qualifications need be explicitly stated with number and date of the certificate.

The designation of each member on the teaching staff is also required, or the whole thing becomes a muster roll with little or no definiteness.

Where the number of teachers is more than what is allowable or justifiable under the Madras Educational Rules, a note of explanation should necessarily be added specifying the purpose for which the arrangement is made.

7. In column (10) of the application, the scale of fees in force may likewise be given for verification and scrutiny.

8. In column (11) of the application may be given the number and date of the order recognizing the school, if already on the aided list.

9 This office cannot be held responsible for failure on the part of the correspondents to send in their applications in time.

S. SWETARANYA SASTRI,
Sub-Asst. Inspector of Schools, Triplicane Range.

Triplicane, 22nd October 1918.

EXAMINATION IN SCHOOL MANAGEMENT AND THE ART OF TEACHING FOR EUROPEAN TEACHERS IN EUROPEAN SCHOOLS.

An examination in School Management and the Art of Teaching under article 85 of the Code of Regulations for European Schools, Madras and Bangalore, will be held on the 9th of December 1918. The centres of the examination will be notified later.

2. The examination is open to European teachers who have taught in recognized European schools in the Presidency of Madras or the Civil and Military Station, Bangalore, for not less than two years since December 31st, 1905, under the observation of the Inspector of European Schools, Inspector of Schools, Ninth Circle, or an Inspectress of Girls' Schools, and who have satisfied the Inspector or Inspectress concerned as regards their methods and skill in teaching and in class management.

Applications should be made on printed forms which can be obtained from the Inspector of European Schools, Old College, Madras, S. W., and should reach the Inspector not later than 31st October 1918. They should be accompanied by a covering letter, in which should be quoted any remarks made by the inspecting officer in table (b) of the annual inspection reports of the present and previous years relating to the merits of the teacher and his or her eligibility to appear for the examination. It should also be mentioned whether the applicant has appeared for the examination before.

Applications from teachers employed in schools should be submitted through the inspecting officer concerned in order that the latter may have the opportunity of granting the certificate of eligibility appended to the printed form of application. No fee need be paid before the submission of this application, but such teachers as are found eligible after scrutiny of their applications will be required to pay the prescribed fee (rupees five) before admission to the examination.

3. Applications from teachers who seem to satisfy the conditions of admission on the date of receipt of this notification should be submitted as soon as possible, in order to facilitate verification in the office of the facts stated in the applications and to afford ample time for determination of their eligibility or the reverse.

4. Candidates are cautioned to assure themselves that their applications have been received should enclose an addressed post-card in their respective applications. The post-card should bear the sender's address only and no other writing. Such post-cards will be returned to them in due course with the Inspector's acknowledgment.

Number work and Elementary Mathematics.—Suitable methods and apparatus, especially practical methods in arithmetic and geometry, and oral methods in arithmetic.

Geography.—Its relation with nature study on the one hand and history on the other—importance of abstraction or generalization in geography teaching—the real meaning and use of maps—map drawing *not* map copying—other useful apparatus.

Importance of biographies, how to select and teach biographies. Necessity of a knowledge of human nature and of realistic treatment. Influence of the study of history on character.
